

Gasteria "Little Warty"

Gasteria are fun succulents, and 'Little Warty' is no exception! Its leaves are thick, covered in little "warts". Gasteria are easily cross-bred with Aloes (where we get the hybrid Gasteraloes from).

Gasteria get their name from the shape of the leaves, which is thought to resemble a stomach (hence the Greek prefix "gaster," meaning "belly").

Gasteria have typical watering needs for a succulent. It's best to use the "soak and dry" method, and allow the soil to dry out completely between waterings.

Gasteria 'Little Warty' is not cold hardy, so if you live in a zone that gets colder than 30° F (-1.1° C), it's best to plant this succulent in a container that can be brought indoors. It does well in bright sunlight.

If planting indoors, place in a room that gets a lot of sunlight, such as near a southern-facing window (if you're in the Northern Hemisphere).

Category: Succulent plants

Families: Xanthorrhoeaceae

Genus: Gasteria

Species: maculata 'Little Warty'

Geographical Area of Origin: South Africa

Climatic Zones: Sub-tropical, USDA 10 b (Southern Italy and islands)

Habit: Succulent

Leaves: Evergreen

Colore Foglie: Verde 

Flowering Period: Gennaio / Febbraio / Marzo / Aprile / Maggio / Giugno / Luglio / Agosto / Settembre

Flower: Simple flower

Colore Fiori: Rosa  Rosso  Giallo 

Favorite soil: Neutral / Light sandy / Middle-Dough / Medium soil

Water needs: Low / little water

Light Exposure: Medium shade / Half shade / Full light / Full sun

Form: Grown as shrub / bush
